NURSERYMEN - HORTICULTURISTS - LANDSCAPE ARCHITECTS

Let Us Help You Plan - No Job or Order Too Small

A WELL-PLANNED and planted home is the cherished hope of every American family. Pleasing and satisfactory results are only attained through a careful study of your grounds, the selection and planting of the proper material. Hundreds of Kentucky homes, both large and small, have been successfully landscaped from plans and service rendered by our firm. Because of our knowledge, experience and training we are in a position to serve you well. Satisfactory results are assured at surprisingly low cost. LET US HELP YOU

No Charge for Consultation at Nursery

There is no charge for consultation or suggestions at the nursery. If you will bring your plans, measurements, pictures, etc., we will be pleased to give you valuable assistance.

Making Landscape Plans
We make no charge for small, simple plans in Lexington provided we furnish the nursery stock.

Such plans in cities close by (within 30 to 35 miles) are also made free of charge provided sufficient stock is purchased to justify the time and trip required.

A nominal charge is made for plans and consultation for clients farther away, based on distance, time required, etc.

PLANS BY MAIL. We make many plans for customers who cannot come to the nursery. If you will send the dimensions of your property, location of house (with blue prints if possible), the direction it faces, trees, drives, walks, and a kodak picture, we can usually make a very satisfactory plan. For small detail plans through the mail we ask a deposit of \$10.00 which will be deducted when at least \$50.00 worth of stock is purchased. For simple suggestions through correspondence there are no charges, and we are always ready and pleased to render such service.

When to Plant

Shade Trees, Shrubs, and Fruit Trees, when handled with bare roots, are best planted in the fall after we have had sufficient frost to kill the foliage, or in the spring when dormant.

Evergreens, Shade Trees and Shrubs, when dug Balled and Burlapped (B&B), may be planted almost any time during the year if you can give them proper attention such as watering, cultivation and mulching

Asparagus and Small Fruits may be planted in the fall if there is sufficient moisture and your soil is in good condition, otherwise plant in early spring.

No Agents

We sell direct and our contacts are usually made by appointments. Refuse to buy from anyone who represents himself or herself as our agents. WE HAVE NO AGENTS. When dealing direct you get full benefit of our facilities.

GUARANTEE

On orders shipped, called for, or delivered, we guarantee every item to be true to name, up to grade and in good condition when it leaves our nursery. As there are so many forces beyond our control, such as

weather, soil and care, which may cause stock to die, we cannot be responsible for losses. However, we will obsolutely refund or replace without charge any stock which does not reach you in good condition, provided you report within 10 days after receipt of order, and it has not been damaged by the delivering carrier.

On orders which we plant, we guarantee to replace at one-half price all nursery stock which fails to survive the first growing season, providing the account is paid when due. Cost of labor on replacements is extra. However, you are obligated to give reasonable care to the material, such as watering, spraying, cultivating, etc.

QUALITY
as well as price
should be considered in buying Evergreens.
Ours are acclimated and
freshly dug.

The rich, dark green Yew continues to be the favorite among the evergreens. Their hardiness, resistance to diseases and insects and ease of transplanting, make them deserving of their great popularity. There are many shapes and types of growth—upright, semi-upright, columnar, spreading, dwarf and globe—which make them suitable for almost any landscape requirement. In foundation plantings they are unsurpassed. They stand pruning very well and make desirable hedges—dwarf, intermediate or tall. Although slower growing than some other varieties they make desirable specimen plants. We have one of the largest stocks in the South and invite your inspection of our plants of real quality.

Taxus Cuspidata

Taxus Cuspidata Capitata

T. cuspidata (Spreading Yew.) Low, spreading type which is broader than high. Can be pruned into compact form to look like Boxwood or made into a hedge if desired. Withstands heat and cold and is perfectly hardy in our climate. Can be grown in sun or shade. One of the finest spreading Evergreens.

T. cuspidata browni (Brown's Yew). A selected seedling of Taxus cuspidata. Normally grows about 1½ times in height to spread. Needles short, compact and of good deep, rich green. Excellent for hedge or specimen. Can easily be pruned into globe form.

T. cuspidata capitata $(Upright\ Yew)$. An upright, cone-shaped form of medium growth. Desirable for foundation planting or hedge. The most desirable variety of this type.

Each Each 2½ to 3 ft. \$7.50 4½ to 5 ft. \$15.00 3 to 3½ ft. 9.00 5 to 5½ ft. 18.00 3½ to 4 ft. 10.75 5½ to 6 ft. 21.00 4 to 4½ ft. 12.75 6 to 7 ft. 25.00

T. cuspidata intermedia. An interesting type. Faster growing than T. nana, slower than T. cuspidata. Good color.

Each Each 18 to 24 in. \$6.50 2 to 2½ ft. \$8.50

T. cuspidata nana $(Dwarf\ Yew)$. Of extremely slow growth, forming a low, irregular and picturesque outline. Can be used as a specimen, hedge or dwarf edging.

T. cuspidata vermeulen (Vermeulen Yew). An upright vase-shaped type of unusual character. Its irregular, rather open formation is quite distinct. Good green color throughout winter. You will be pleased with it where an informal plant is desired.

Each 18 to 24 in. \$6.00 2 to 2½ ft. \$7.00 2½ to 3 ft. 8.00

Sizes

On spreading type evergreens, sizes listed indicate width. On upright types, the sizes indicate height.

Che Disease Resistant Evergreen

Globe Taxus Cuspidata

This is a compact form of Taxus, made globular by pruning. Hardier than Boxwood, which it resembes in shape but not in texture.

	Each
18 to 24 in.	\$ 8.00
2 to $2\frac{1}{2}$ ft.	10.00
$2\frac{1}{2}$ to 3 ft.	12.50

T. media hallorani (Halloran Yew). A full, semi-upright type. Good color.

2 to 2½ ft.\$7.00 2½ to 3 ft. 8.00

Taxus Hedge

T. media hatfieldi (*Hatfield* Yew). A rather dwarf, compact, columnar form with upright branches. Good dark green color. Excellent for low, narrow hedge or to plant in a restricted area.

	Each			Each
18 to 24 in.	\$6.00	$2\frac{1}{2}$ to	3 ft.	\$8.00

Taxus Cuspidata

EVERGREEN QUALITY

Every Evergreen has been transplanted to increase the root-system, and sheared to make it compact. Height does not indicate compactness and shapeliness, nor does price indicate VALUE—seeing is believing!

Cuspidata
[5]

Hillenmeyer's Beautiful Evergreens

OR beauty winter and summer, the Evergreen has no equal. Succeeding in almost any soil, with their range of color, form and habit of growth they find a place in almost any landscape. Our trees are all several times transplanted, and the finest to be had.

All Our Evergreens are Dug B&B

B&B means the plants are dug with a ball of earth and wrapped in burlap. This is the safest and best way to move them.

Chamaecyparis	
A group of beautiful Evergreens including some of the most unique	C. pisifera filifera (Thread-Branched Cypress). One of the best dwarf
and interesting trees in cultivation. Valuable in garden or founda-	Evergreens. Unusual foliage, drooping and graceful, resembling
tion planting. Prefers a moist acid soil but will grow almost anywhere	cords of green. Compact, fine in color both winter and summer.
when not too dry or alkaline.	2 to 2½ ft\$5.00
CHAMAECYPARIS pisifera (Sawara Cypress). The foliage somewhat	2½ to 3 ft 6.00

CHAMAECYPARIS pisifera (Sawara Cypress). The foliage somewhat resembles that of the Arbor-Vitae except that the tree is more graceful. Light green, silvery beneath, and of erect growth. Can be used in foundation planting or as specimen. $2\frac{1}{2}$ to 3 ft. Each

JUNIPERUS communis	ashfordi (Ashford's Juniper). Columnar with si	lvery green
	Irish Juniper except not quite so compact	or pointed
and larger in diam	eter. Holds color well in winter.	
	Each	Each
7 to 3 ft	\$3.00 31/4 to 4 ft	¢450

4.00 4 to 41/2 ft. J. communis depressa plumosa (Purple Spreading Juniper). A very low spreading variety, which lies close to the ground. In summer it has a silvery reflex to the otherwise gray-green foliage. In fall and winter assumes a purplish cast that is unusual in Evergreens. Fine for rockeres or low plantings.

21/2 to 3 ft.\$7.00

J. communis hibernica (Irish Juniper). A distinct, slender, columnar form with glaucous green foliage. The numerous upright branches are closely adpressed. Its formality is invaluable where a narrow plant must or should be used. Needs no shearing.

2 to 21/2 ft.\$5.00 J. chinensis pfitzeriana (Pfitzer Juniper). The most popular of all the spreading Junipers. The branches grow horizontally with slightly drooping terminals. The foliage is a bright gray-green which is retained throughout the winter. Desirable because of its form, hardiness, color, and ability to grow in almost

Residence of Mr. and Mrs. A. D. Caven, Mockingbird Ave. Another Gunnison home made more beautiful through the use of Hillenmeyer plants.

Shade trees add to the charm of this home.

J. excelsa stricta (Spiny Greek Juniper). An unusually attractive, dwarf pyramidal Evergreen with compact, bluish green foliage. A valuable small, compact plant which can be used on either side of steps, walks or planted in

2 to 21/2 ft.\$4.00

J. virginiana cupressifolia. A pyramidal type with green foliage. A recent introduction that will gain in popularity. Grows on wide range of soils and stands shearing well. Not available in $4\frac{1}{2}$ to 5-ft, size.

J. virginiana canaerti (Canaert Juniper). A fine, rather compact, pyramidal variety with tufted dark green folioge which is retained throughout the winter. Can easily be kept in bounds by slight pruning. Frequently has attractive silvery blue berries. Valuable for foundation plantings.

J. virginiano hilli (Hill's Dundee Juniper). A pyramidal compact growing Evergreen of much merit. Bluish green foliage in spring, changing to plumlike color in early autumn. Stands shearing well. Excellent for formal planting. Not available in 4½ to 5-ft. size.

J. virginiana keteleeri (Keteleer's Cedar). A fairly compact, pyramidal tree, well proportioned as to height and spread. Its large, slate-colored berries form a distinct contrast against the ligher, "fleshy" green foliage. Excellent for foundation or specimen. Will grow well in almost any soil. Prices of 4 preceding Junipers:

Juniperus Chinensis Pfitzeriana

Pinus - Pine

"Lord, let me be a Pine that lifts its hands up high To grasp the subtle secrets of the sky."—Edna DeRan

This grand family of Evergreens is of great economic importance. It is symbolic of strength, endurance and perseverence, and has long occupied a prominent place in art, literature and commerce. There are many forms, but the large, rugged, conebearing varieties are the ones which are of such importance. They do not like city conditions of soot, smoke and dust but are at home in the great outdoors. When small they are more or less compact and shapely, but as they develop, age brings a charm and beauty which few trees possess. They will grow in almost any well-drained soil. Plant Pines for permanency and beauty.

P. strobus (White Pine). One of our most
beautiful native Evergreens, growing into
a tall, majestic specimen. Needles 3 to 4
inches long, soft and flexible. Grows well
in both dry and moist soil. It is a beau-
tiful object planted alone and we think
it one of the most desirable of our orna-
mental Evergreens.

Experts Tell Us

We have the finest Evergreens to be found in any nursery. Seeing is believing.

Picea Abies, Listed on Page 7

Chuja -- ARBOR-VITAE

One of the most popular and extensively planted Evergreens. The branches are flat or grow in layers. To many, they are known as "pressed Cedars." While they prefer a moist soil or ample water they will grow almost anywhere. They vary in color from green to yellow and in shape from globe to pyramidal.

THUJA occidentalis globosa (Globe Arbor-Vitae). Usually develops into a perfect, globe-shaped plant, the spread equaling the height. The foliage is light green and attractive. They are largely used for front-line planting, in urns, vases, on either side of a step and in formal work where symmetry is desired.

										Lucii

Quality is Remembered AFTER PRICE is Forgotten

Ilex Rotundifolia (Listed on page 9)

Euonymus Patens

Abelia

BELIA grandiflora (Giossy Abelsa). A desirable, medium growing semi-evergreen shrub for foundation planting, filling corners, curves or can be used as a hedge. The small, glossy leaves remain on most of the winter. Small, dainty blush-white blossoms are borne on rather arching branches from May until frost. We like Abelia. Each Each Each 18 to 24 in., B&B \$2.50 2 to 3 ft., B&B \$3.00 ABELIA grandiflora (Giossy

Barberry

BERBERIS julianae. The best of the evergreen Barberries. Holds its narrow green leaves on golden stems throughout the winter.

Each

18 to 24 in., B&B \$4.00 2 to 2½ ft., B&B \$5.00

2 to 21/2 ft., B&B\$5.00 B. mentorensis. This semi-evergreen, rather upright Barbarry is useful as an individual specimen or as a hedge. Does well in dry locations.

Each

18 to 24 in., B&B\$2.50 2 to 2½ ft., B&B\$3.00 (Deduct 50c each for bare rooted plants)

Buxus Sempervirens (Common Box)

With lustrous, green foliage, it is a plant that can be used in many ways and lends an air of dignity and permanence to its surroundings. As a hedge it gives character; in an informal group it has no rivals; it may be clipped or trained to pyramid form, globe shape or allowed to grow naturally. Box is used freely in window boxes, urns, and for garden edgings. Should be planted in good soil and fed with sheep or cow manure. Cultivate lightly and do not disturb the roots

SPECIMEN PLANTSEach

Cotoneaster

COTONEASTER apiculata. Low spreading, semi-ever-green shrub. Red berries in fall. Each 12 to 15 in., 85B . \$2.50 C. francheti. A semi-evergreen shrub, with gray-green leaves borne on pendulous branches. Pink bloom fol-lowed by an abundance of orange-red berries in the to 3 ft., B&B\$4.50

Magnolia

MAGNOLIA grandiflora (Southern Magnolia). The popular evergreen tree Magnolia of the South. Waxy leaves. The large white blossoms appear on older trees in midsummer. Not always hordy in Kentucky, but can be grown in protected places. Prefers rich epil

Mahonia

Nandina

Broad-leaf Evergreens

O MANY home owners do not know what this title means! Think of the Hollies and the Laurels as examples. We would miss the glossy green foliage of the Broad-leaved Evergreens in early spring, the deeper colors of summer, and the cheerful contrast they give to dull winter scenes, if they were removed from our landscape. They may be used as specimen plantings with tall evergreens or in the shrub border. You will be delighted with their beauty all the year-and pleased with the plants we supply.

Euonymus

llex - Holly

ILEX crenata rotundifolia. A rather dwarf spreading variety of Japanese Holly, with glossy, nearly round leaves. One of the hardiest of the species and excellent for foundation planting or hedge.

crenate convexa. A compact spreading evergreen shrub with arched branches and small convex leaves. Not available in 2- to 2½-ft. size.

I. glabra (Inkberry). A rather loose growing evergreen shrub which will succeed in either sun or shade. Leaves turn a somewhat purple shade in the fall. When planted in mass the shining black berries are most attractive. One of the hardiest varieties.

2 to 21/2 ft., B&B\$6.50

1. opaca (American Holly). Our native Holly which supplies the garden with opaca (American Holly). Our native Holly which supplies the garden with year 'round greenness and richness and is prized so much at Christmas time because of its large, glossy leaves and striking red berries. Stands pruning well and can therefore be used as a specimen, in foundation plantings or as a hedge. Some trees bear berries (pistillate, female), while others (staminate, male) do not. It is necessary that you have a male Holly growing close by or one should be planted in every group for pollination. They will grow in partial shade or in the open.
 Non-Berried Berried 10.04 to 5 ft., B&B
 8.00
 12.00

Prunus (Laurel Cherry)

Viburnum

Ilex Opaca

Hedges The Friendly Way to Fence

A thrifty, green hedge gives more character and beauty to home grounds than any fence ever devised. The first cost is usually less than ordinary fence and trimming less expensive than painting. A hedge is an effective boundary marker, a wall of living green that protects the world within from the world without. The different hedge plants here are adapted to a variety of uses—and the plants themselves are in every way Hillenmeyer standard. All hedges should be cut back at least one-third when planting.

Chinese Privet (Ligustrum Sinense)

A rapid, semi-evergreen, loose growing plant that is desirable for hedge or screen. It prunes beautifully and can be kept to almost any height desired. When closely clipped the leaves are quite small and look almost like Boxwood. Occasionally freezes to the ground during a severe winter but always comes back with renewed vigor. Our plants are bushy transplants and should not be compared with light seedlings.

2	to	3	ft.	 	 6.75	12.00	24.00	230.00

California Privet (Ligustrum Ovalifolium)

Upright in growth, dark, thick, almost evergreen foliage and one of the most popular hedge plants. Can be pruned easily and does not require clipping as often as the Chinese Privet and is somewhat hardier.

Ibolium Privet (Ligustrum Ibolium)

This comparatively new Privet has proven hardy under the severe tests of the past few years. It has many characteristics of the California Privet though not as evergreen, and is as hardy as its offernearent, the Ibota Privet. This superior Privet is a welcomed addition since it can be grown and sold at the price of California Privet.

Plant Privet 6 to 12 inches apart

California Privet

Fragrant Bush Honeysuckle (Lonicera Fragrantissima)

One of the most satisfactory tall-growing screen or hedge plants. We do not recommend it where you want to keep it under 3½ to 4 feet. It is strong, vigorous, hardy, dense and holds its foliage well into the winter. The small, cream, bell-shaped blossoms appear in early spring and are quite fragrant. Normally growing into a hedge 6 to 12 feet. Requires little pruning and will thrive on almost any soil. Whether kept pruned or permitted to grow naturally, it is one of our most useful shrubs to screen out objectionable views or to give privacy to your property. Plant 12 to 24 inches apart, depending on the density desired. Shorten back at least one-half after planting.

Japanese Barberry (Berberis Thunbergi)

Each year sees an increased use of Japanese Barberry as a hedge plant. It is graceful, ornamental, serviceable, and hardy—four points that place it at the top of the list. The foliage unfolds in early spring, followed by yellow flowers, and later by red berries that remain all winter. In autumn the whole plant assumes a red tone. The drooping branches are thickly set with small spines that will turn cats or dogs. Japanese Barberry is excellent for foundation planting or for massing in corners. It thrives in bright sun and does well in shade.

Japanese Barberry Hedge

Climbing and Creeping Vines

"Then the Wild Clematis Comes, With Her Wealth of Tangled Blooms." -Goodale.

These are the draperies that Nature gives us to cover porches, arbors, fences and to disguise unsightly buildings and old trees. Most varieties listed are strong growers, with either bright flowers in summer or brilliant berries in fall. Use vines freely to make the landscape more beautiful. They thrive almost anywhere, cost little, and give a large return in comfort and pleasure.

Campsis Radicans (Trumpetcreeper)

A vigorous, woody vine, bearing scarlet flowers followed by long pods. It is a native of this section easy to establish, and grows luxuriantly. Valuable for covering old walls, trees, stumps, etc. \$1.00 each;5 for \$4.50.

Celastrus - Bittersweet

CELASTRUS scandens (American Bittersweet). An unusually attractive native vine because of its showy red berries in the fall and early winter. Vigorous.

\$1.00 each; 5 for \$4.50.

Celastrus Scandens

Hedera - Ivy HEDERA helix (English Ivy). The most popular evergreen vine. Has large, deep green, glossy

foliage, and is unexcelled for covering walls in shady and cool places, or used as a most satisfactory ground cover under trees or in shady places. Strong vines. 30c each; 4 for \$1.00; \$20.00 per 100.

Hydrangea

HYDRANGEA petiolaris (Climbing Hydrangea). Slow growing deciduous vine. Lovely, fourpetal white flowers appearing in June. Ideal for low walls. \$2.00 each.

Lonicera - Honeysuckle LONICERA japonica halliana

(Hall's Japanese Honeysuckle). An evergreen twining vine that is so much used to cover fences and trellises. Blooms continuously, is fragrant, and very easy to establish. Used largely to hold roadside banks from erosion and will flourish in poor soil. 25c each; 5 for \$1.00.

L. sempervirens (Trumpet Honeysuckle). Attractive, trumpet-shaped flowers of bright scarlet. \$1.00 each; 5 for \$4.50.

Vinca Minor

large, purple flowers. Exquisite when it can be grown. \$1.25 each.

paniculata (Sweet Autumn Clematis). The small-flowered fragrant, white "star" variety that blooms so profusely. Easy to establish and attractive in foliage as well as blossoms. \$1.00 each; 5 for \$4.50.

Clematis CLEMATIS jackmani. The most popular Chinese Clematis. Has

Euonymus

EUONYMUS radicans (Common Winter Creeper Euonymus). A slow growing vine that adheres to masonry and remains deep green all winter. \$1.00 each; 5 for \$4.50.

E. fortunei coloratus (Bronze Winter Creeper). More rapid crowing than others of this family. It has long, vigorous shoots, well covered with medium, sharply pointed leaves. Clings exceptionally well and makes an artistic effect on a bare wall or chimney. Turns a rich bronze during the winter months. \$1.00 each; 5 for \$4.50.

E. fortunei vegetus (Big-Leaf Winter Creeper). Another evergreen clinging vine of moderate habit, perfectly hardy, and especially valuable because of the profusion of red berries that hang on for several weeks. \$1.00 each; 5 for \$4.50.

Clematis Jackmani

Parthenocissus - Ivy

PARTHENOCISSUS quinquefolia (Virginia Creeper). The five-leaved by that is valuable for covering walls, old trees, fences, etc. It will grow anywhere

ARTHENOCISSUS quinquefolia (Virginia Creeber). The five-leawed Ivy that is valuable for covering walls, old trees, fences, etc. It will grow anywhere and colors brilliantly in the fall. \$1.00 each; 5 for \$4.50.

• tricuspidato (Boston Ivy). The best of the self-clinging vines. Foliage is deep green and very dense, covering any object completely. Colors in the fall. Slow to start, but vigorous when established. \$1.00 each; 5 for \$4.50.

• lowi (Dwarf Boston Ivy). Like Boston Ivy it clings well. Small, dainty leaf that colors some in autumn. Ideal for restricted areas, or where light coverage is desired.

\$1.25 each; 5 for \$5.75.

Polygonum - Fleece Vine

POLYGONUM auberti (Silver Vine Fleeceflower). A quick-growing vine with small, attractive foliage. The flowers are very small and lacy and when the plant blooms it is a perfect mass of silvery white; there is no other vine producing anything like the same effect. Blooms from August to frost. \$1.00 each; 5 for \$4.50.

Pueraria - Kudzu

PUERARIA thunbergi (Thunberg Kudzu Bean). The most rapid growing, twining vine known today. It is marvelous how it will cover fences, pergolas, or similar objects. The large, purple flowers are sweetly scented. Belongs to the Pea family, and the foliage is dark green.

\$1.00 each; 5 for \$4.50. Ask for special prices in quantity.

Wistaria

WISTARIA sinensis (Chinese Wistaria). A rampant, clinging vine that has the robust vigor of a wild Grape and the matchless beauty of a rare exotic. Flowers in large, drooping clusters. There is so much complaint of Wistaria not blooming we are offering plants that are grafted from blooming wood. Wistoria always needs to be well established to bloom treely. blooming wood. Wistaria a freely. **Purple** and **White**. \$1.25 each; 5 for \$5.75.

Tree Wistaria

We have some "standard" or tree Wistaria. Limited quantity.
Four to five feet, stocky plants. Purple only.
\$10.00 each.

Vinca Minor (Periwinkle or Trailing Myrtle)

Deciduous Crees

For Shade and Beauty

"No place is complete without trees. A home without trees is charmless; a road without trees is shadeless; a park without trees is purposeless;"

W HEN hot summer sun beats down, you long for the welcome shade of a Maple, an Oak, or a broad-petaled Elm. But to have and enjoy such shade and shelter, you must plant ahead. The trees must be planted in fall or spring when the weather is cool. Then the roots take hold, the tree flourishes, and in a surprisingly few seasons the outspreading branches give the protection you desire.

We can supply—at reasonable prices—large trees that will give immediate effect, as well as the smaller specimens from 6 to 15 feet, that are listed herein. It is not practical to pack and ship the larger sizes, but we can load on customer's truck at our nurseries, sizes larger than those listed here. Our trees are well grown, root pruned, and transplanted several times; they are truly Hillenmeyer standard.

"He Who Plants a Tree, Plants for Posterity"

There is no warrior who'll fight for life
More valiantly than a tree,
On rocky wind-swept ledge at mountain crests
Or on the fiercely elemental coastline by the sea.

—R. H. Weisbrod

Acer - Maple

ACER platanoides (Norway Maple). A vigorous, dense, round-headed tree, valuable for street or lawn planting. The large, dark green leaves turn a pale yellow in the fall. It resembles the Sugar Maple except the leaves are larger and it is not as tall growing. May be planted under electric or telephone wires, causing little interference.

A. platanoides schwedler (Schwedler Maple). Similar to the Norway, except in early spring the foliage is a bright purple, changing to bronze and then to dull green. In the fall it turns bronze before defoliating. **Available only in 2\frac{1}{2}-in. sizes.**

Norway Maple

HEIGHT OF SHADE TREES

The appoximate height of shade trees to their diameter is as follows:

7 to 9 ft. 2 in. ... 12 to 14 ft. 1½ in. ... 8 to 10 ft. 2½ in. ... 12 to 15 ft. 1¾ in. ... 10 to 12 ft.

However, the Diameter is the Determining Factor.

Silver Maple

- A. rubrum (Red Maple). A native tree which is not appreciated and one of the most attractive as a lown specimen. The current season's growth is bright red in winter. Flowers and seed pods are red, appearing before the leaves, which in fall vie with the Oaks, Sassafras, Gum, Sumac, or Sugar Maples for magnificence in color.
- A. Saccharum (Sugar Maple). Known everywhere and extremely popular. The tree grows to great size, erect, conical form, is perfectly hardy, withstands any subnormal weather conditions, and is adaptable to nearly all types of soil. The tree yields valuable timber, as well as maple sugar. Foliage is deep green, turning to indescribable colors in the fall.

A. saccharinum (Silver Maple). Because of its quick growth and good foliage, this tree is in great demand. The leaves appear early in spring, are light green on the upper side, silvery beneath, and remain until late fall. Small flowers open before the leaves appear. For planting as temporary trees—that is, alternate between the hard-wooded and slower growers, such as Oaks, Elms, Sugar Maples, Gums, etc., the Silver Maple is highly recommended.

Betula - Birch

BETULA papyrifera (Paper or Canoe Birch).

A handsome, medium growing tree with creamy white, paper-like bark and pendulous branches. While native to the northern states, does well in Kentucky. The small, ovate, serrated leaves turn yellow in fall.

7 to 8 ft., 11/4 in. cal. ...\$5.00

8 to 9 ft., 11/2 in. cal. ...\$5.00

9 to 10 ft , 13/4 in. cal. ...\$5.00

- B. pendula alba (European White Birch).
 Tree of moderately quick growth, erect, with terminal branches slightly drooping.
 Bark almost white. As a specimen, and especially contrasted with evergreens, it makes a valuable tree for the lawn. Prefers a moist place, but will do well in dry ground.

 7 to 8 ft., 11/4 in. cal.\$5.00

 8 to 9 ft., 11/2 in. cal.6.50
- B. pendula laciniata (Cut-leaf European White Birch). A weeping form of the European White Birch. Inclined to be rather pyramidal when young but as it matures develops a broad top. Its small, pendulous branches eventually almost touch the ground. Because of its deeply serrated leaves, white bark and weeping habit, it is one of our most highly prized trees for small lawns, cemetery lots, planted as a specimen or in groups.

DECIDUOUS TREES—Continued

Carpinus - Hornbeam

CARPINUS pyramidalis (Pyramidal European Hornbeam.). A much prized, narrow, compact, stately tree of columnar habit and Beech-like foliage. It is tough—will tolerate city conditions, transplants kindly and holds its leaves most of the winter. Stands clipping remarkably well and for this reason can be used for a tall hedge, pillars, or on either side of an entrance.

18 to 20 ft. (Heavy) B&B ... \$50.00 (At the nursery.)

(At the nursery.)

CARPINUS caroliniana (American Hornbeam). Sometimes called Blue Beech or Ironwood. Bushy tree with dense round head. Leaves are bluish green above, yellow-green below. Splendid for tall hedges. The bark of the trunk strongly resembles that of the Beech.

7 to 9 ft., 11/4 in. col. . . \$ 5.00 8 to 10 ft., 11/2 in. cal. . . 6.50 10 to 12 ft., 13/4 in. cal. . . 8.50 12 to 14 ft., 2 in. cal. . . 11.00 (BGB—50% extra)

Castanea - Chestnut

CASTANEA mollissima (Chinese Blight-Resistant Chestnut). Small tree, valuable for shade or nuts. With our native variety practically extinct, this will take its place. Foliage beautiful in summer changing to yellow in fall. Fruits early and prolifically and is of good quality.

Spraying and Tree Feeding

We are equipped to spray and feed large trees, using modern equipment and scientific methods. If your favorite tree is being destroved by insects or is starving, you may need expert advice and treat-ment. Write and consult us when in need of this service.

Like other plants, trees should be fed for best results. See our Plant Foods listed on inside back cover.

DECIDUOUS TREES—Continued

Malus - Flowering Crab

The Flowering Crabs have few rivals among the gorgeous spring-flowering trees. They are hardy, of easy culture, and will thrive in almost any soil. They are available in many shades and when used as specimens or mass plantings are most effective. Many kinds bear very ornamental fruit. No lawn is complete without one of these gems. one of these gems.

MALUS ALMEY (Almey's Crab). 12 to 15 ft. This is an outstanding new variety. Carmine buds, opening to crimson, and holding the color well. White marking at base of each petal. Tree blooms at a young age, and individual flowers are very large. Fruit is maroon when ripe. 4 to 5 ft. . \$3.00 5 to 6 ft. . \$3.50

M. arnoldiana (Arnold's Crab). 10 to 15 ft. Large, soft pink flowers, opening to almost pure white. Conspicuous yellow and red fruit.

M. dolgo. 15 to 20 ft. Compact in form.
White flowers followed with conspicuous red,
medium sized, edible fruit. Very showy in August.

M. eleyi (Ely Crab). 12 to 15 ft. The best of the purple or red-leaf Crabs. Covered in spring with clusters of large pink flowers, followed by showy purple-red fruit.

M. ellwangeriana. 12 to 15 ft. Rather upright with white flowers. Its brilliant red fruit with yellow blush in the foll is extremely showy.

M. hopa (Red Flowering Crab Apple). 18 to 20 ft. Strong, healthy, upright tree, rose-pink flowers. Fruit red inside and out.

*M. ioensis plena (Bechtel's Crab), 12 to 15 ft. Rather slow grower with upright, spreading branches. Its double pink flowers resemble clusters of small Roses. Available in 4 to 5 ft. only.

M. purpurea lemoinei. A bronze-leaf type with semi-double carmine flowers, bears purplish red fruit in fall. Excellent for specimen or background.

scheideckeri (Scheidecker's Crab). 10 to 15 ft. Compact, upright growth with small, bright, single rose blossoms borne in profusion. M. scheideckeri Fruit yellow.

M. spectabilis (Chinese Crab). 12 to 15 ft. Upright form with semi-double, pale pink blossoms. Yellow fruit. Desirable.

M. zumi calocarpa. 12 to 15 ft. The finest of all the white Crobs. The buds are pink but expand into lovely large white blossoms which literally cover the tree. Fruit small, bright red

LARGE UPRIGHT SPECIMENS AT NURSERY

Populus - Poplar

POPULUS nigra italica (Lombardy Pop-lar). A tall, slender tree of rapid growth, reaching a great height and not to be confused with Carolina Poplar. Specimens often reach 50 feet, with a spread of less than 10 feet and for this reason when trees are needed for narrow places, between buildings, congested lawns, narrow avenues, Lombardy Poplar may be used to advantage. Because of its great height and quick growth it is recommended for backgrounds, to add character to plantings or to offset straight or bare lines; for screening views, windbreaks —and for quick effects.

P. alba bolleana (Bolleana Poplar). Just

because the Carolina Poplar is an enormous weed and nothing more, one should not discriminate against all the Poplar family. Bolleana Poplar has glittering green leaves, silvered underneath, and makes an attractive display against the sky when they are set in motion by a gentle breeze. The bark is gray, giving a pleasing winter effect. It is a fast growing, slender, columnar tree a little wider than Lombardy, which it resembles at a distance and for which it can be used as a substitute.

7 ft. 7 to 8 ft. 8 to 9 ft. 9 to 10 ft. 10 to 12 ft. 12 to 14 ft.

LARGE TREES

In addition to the stock listed we have many large, fine specimens which will give immediate effect, at moderate cost. Why wait a lifetime for results? Write or con-

Prunus Flowering Plum

PRUNUS blireiana (Blireiana Plum). A small, neat tree with rather upright branches on which are borne salmon-pink rosettes in great profusion. Very showy and desirable.

P. cistena. A handsome, upright tree with small pale pink flowers, wine-red fruit and purple foliage. Available only in 4 to 5 and 5 to 6-ft. size.

P. divaricata (Thundercloud Purple Plum). A beautiful shapely tree with dark purple foliage about the color of the Purple Beech. Fine for contrast. trast.

The Singing Leaves

But the trees all kept their council
And never a word said they,
Only there sighed from the pine tops
A music of seas far away.

— Lowell

Quercus-Oak

The Oak, with all its majesty, is the monarch of the woodlands. It is symbolical of strength, permanency and character. It has been interwoven. since time immemorial, with literature, art and craftsmanship. The family has world-wide distribution, containing many species, both evergreen and deciduous. Its timber is emblematical of strength and durability. By some it is considered of slow growth, but when given a congenial soil, develops rather rapidly in comparison with most hardwoods. When planted as specimens or street trees, varieties like Pin Oak, with their autumn coloring of yellow, orange and scarlet, are the source of enjoyment to him who plants, and elicits the admiration of the public. No lawn is complete without an Oak.

- QUERCUS alba (White Oak). One of the greatest of all the Oaks. Rather difficult to transplant and of slow growth, but "patience brings a perfect reward." Leaves silver to purplish red in autumn. Not available in 2 in. and 2½ in.
- **Q. macrocarpa** (Bur Oak). A native variety of slow growth, but becomes a stately tree well covered with thick, dark green foliage of heavy texture. For permanency it has no superior. Prefers a deep soil. Available only in 11/4 in.
- Q. nigra (Water Oak). A round-topped tree of good form, Will grow in either moist or dry soil. Foliage green until late fall. Not available in 2 in, and 2½ in.

- Q. palustris (Pin Oak). The most popular of all the Oaks. Its beautiful glossy, deeply lobed green leaves change to gargeous shades of purplish red and scarlet in the autumn. It is symmetrical, easy to transplant and of rapid growth. For street, avenue or as a lown specimen there is nothing superior. Where a desirable hardwood tree is wanted we unhesitatingly recommend c Pin Oak.
- Q. borealis (Rubra) (Northern Red Oak). Not as compact nor does it color as brilliantly as the Pin Oak. Somewhat more difficult to transplant but grows in almost any soil when established. One of the fine Ocks.

Platanus - Sycamore

PLATANUS occidentalis (American Plane Tree). Our native Sycamore which is not appreciated. However, if you want a tree of rapid growth, rugged in character, picturesque in winter with its white bark, you should not overlook this grand old tree. Fine for woodland and paddock. Tolerant of soot and smoke, and therefore is much used as a street tree in cities.

Feed Your Trees

Like other plants, trees should be fed for best results. See our Plant Foods listed on inside back cover.

Part of a Block of Sugar Maples

With good spacing, clean cultivation, proper pruning you are sure to get good trees, like these from Hillenmeyer's. A visiting nurseryman said that this is the best block of Sugar Maples of this size he has seen in America.

Ulmus Parvifolia

Flowering and Ornamental

"The beautiful lessons which 'blossoms' teach to children."-Chaplin

HERE is a place for flowering shrubs around every home—cottage, mansion or palace. A corner needs a little color, a foundation wall needs to be concealed, a garage should be screened. In all these places flowering shrubs are adaptable and useful.

From our fields this year we shall take the finest shrubs possible to grow—large, well developed, with good roots, and not by any means like the shrubs sold on "bargain" which in many cases are of unknown origin. In fact, Hillenmeyer shrubs are heavy and carry several canes.

The size shown after each shrub indicates the approximate height it should be expected to attain.

ABELIA grandiflora. (See page 9.)

ACANTHOPANAX sieboldianus (Five-Leaved Aralia). 4 to 6 ft. An interesting and very satisfactory shrub for planting in a shady place or under city conditions. Branches upright, prickly, arching and bearing bright green leaves in fives. If you have a troublesome situation, poor soil, shade or other adverse conditions give this shrub a trial.

3 to 4 ft.\$1.25 2 to 3 ft.\$1.00

Aralia

ARALIA spinosa (Devil's Walkingstick). 10 to 15 ft. A large, vigorous shrub or small tree giving semi-tropical effect. The stiff, erect, very prickly stems bear compound leaves which may be 2 feet or more in length. The leaflets are small, giving a feathery effect to the whole plant. Small white flowers in July or August. A very effective shrub when properties of the state of the

Berberis - Barberry

BERBERIS thunbergi (Japanese Barberry). 3 to 4 ft. Low, compact shrub with horizontal or arched branches. Twigs thorny, making it ideal for an almost impregnable hedge when mature. If left unpruned it will develop into a graceful, moundlike plant. The small green leaves come out early in the spring, along with the small yellow flowers. The foliage takes on a brilliant orange-scarlet when in the open and the flowers are followed by brilliant red fruit which persists throughout the winter. Will grow in almost any location.

Each

Each

So.60

2 to 2½ ft.

\$1.00

B. thunbergi atropurpurea (Red Leaf Barberry). 3 to 4 ft. Resembles the Japanese Barberry in growth, but the foliage is brilliant blood-red in spring. The color holds all summer in sun, but in shady places it becomes a beautiful bronzy green. Its winter charm is enhanced by red berries that remain until spring. Few shrubs attract so much attention, or add so much color to a dull border. We consider it one of the best plants, and our stock is strong and vigorous.

Buddleia - Butterfly Bush

There should be a place for these continuous summer-blooming shrubs around every home. Their long pointed spikes of various shades resemble a Lilac though they are in no way related. Easy of culture. Often freeze to the ground unless protected, but will come back very effect years. BUDDLEIA, Charming, Soft pink; very desirable,

B. DUBONNET, Claret-purple, Nice,

B., Ile de France, Rosy violet-purple, Vigorous and floriferous,

Prices of above 3:

Chaenomeles-Flowering Quince

Flowering Shrubs—Continued

Calycanthus

CALYCANTHUS floridus (Sweet Shrub). 6 to 8 ft. Few shrubs have persisted as well as the Calycanthus. Always found in "Grandma's" garden. Its sweet, aromatic reddish brown flowers are most appreciated. The blossoms are produced in late spring followed by large pods, filled with smooth brown seed. Use as a specimen or for planting in a larger border.

Chaenomeles - Flowering Quince

C. lagenaria alba (White flowering Quince). A white form of the above.

2 to 3 ft. Each \$1.25

Chionanthus - White Fringe

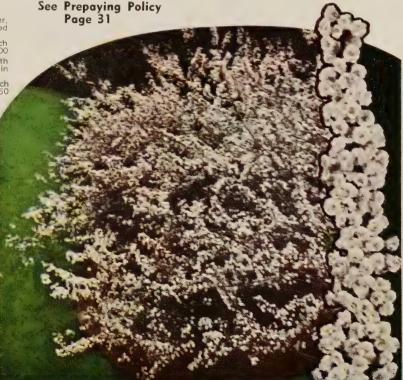

CHIONANTHUS virginiana. 12 to 15 ft. As a large shrub or small tree, for use in border planting or specimen, few plants surpass the White Fringe. Its large, somewhat glossy leaves are attractive throughout the summer and add a pleasing bright yellow to the array of autumn colors. Large clusters of drooping white flowers hang from the ends of the twigs in late spring. Dark blue fruit in August. Prefers a moist, acid soil. Worthy of a place on any lawn.

2 to 3 ft.\$1.00 3 to 4 ft.\$1.25

Cornus - Dogwood

CORNUS florida (White Flowering Dogwood). See page 13.

 C. rubra (Pink Flowering Dogwood). See page 13.
 C. alba sibirica (Siberian Dogwood). 6 to 8 ft. Greenish white flowers in June. Grown because of its conspicuous red winter twigs. Cutting out old wood increases brilliance of new growth.

Spirea Prunifolia (See page 24)

Flowering Shrubs—Continued

Photinia

PHOTINIA villosa (Oriental Photinia). 10 to 12 ft. An unusual shrub not often available. It has deep green, glossy foliage and is of dense, branching habit. The foliage colors brilliantly in the fall, and the small flowers, produced in June, are followed by attractive red beries that hang on until taken by birds.

Each
2 to 3 ft. \$1.00 3 to 4 ft. \$1.25

Prunus - Flowering Almond

PRUNUS glandulosa (Almond Cherry), 3 to 4 ft. Rose-pink. The plants are thickly studded in April with medium sized double pink flowers from base to tip of branch.

Each

Each 2 to 3 ft.\$1.50

Rhodotypos

RHODOTYPOS scandens (Black Jetbead). 4 to 5 ft. Ornamental shrub with bright green, serrated leaves and large white flowers one-half to one inch across in May and June. These are followed by shining black fruits that adhere practically all winter. A desirable shrub.

Each \$1.00 4 to 5 ft.\$1.25

Rosa - Shrub Roses

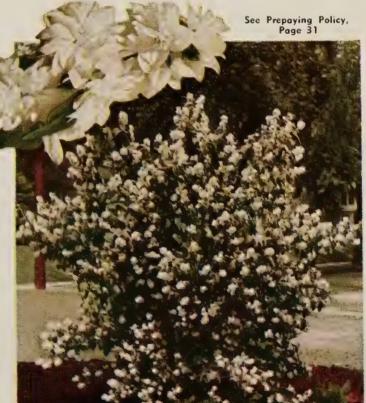

ROSA rugosa, Belle Poitevine. 4 to 6 ft. A hardy Shrub Rose, that bears single pink flowers in June and July. Attractive red fruits following bloom.

Each . . . \$1.50

2 to 3 ft.\$1.50 3 to 4 ft.\$1.75 **R. Hugonis** (Golden Rose of China). 5 to 7 ft. Blooms in May. Single, cup-shaped flowers cover arching branches to tips. Unsurpassed for mass effects and in shrub Each 18 to 24 in.\$1.25

Salix

Philadelphus-Minnesota Snowflake (See page 23)

Flowering Shrubs—Continued

Syringa - Lilac
SYRINGA persica (Persian Lilac). 6 to 8 ft. Rich lilac color; blooms later than YRINGA persica (Persian Lilac). 6 to 8 ft. Rich lilac color; blooms later than old-fashioned kinds.

vulgaris (Common Purple Lilac). 6 to 8 ft. The old familiar Purple Lilac of grandmother's garden, which has lost none of its charm. Entirely hardy; blooms in April.

vulgaris alba (Common White Lilac). 6 to 8 ft. This is the old-fashioned White Lilac. Blooms in April.

Above 3 varieties:

Each
2 to 3 ft.\$1.00 3 to 4 ft.\$1.25 Syringa - French Lilac The so-called French Lilacs have been derived by crossing the best of the species, especially Syringa vulgaris. There are many wonderful varieties and after much testing we have selected the following as the best for our section. Michel Buchner. Double, pinkish Alphonse Lavallee, Double light purple.

Belle de Nancy. Double. Light violet-Mme. Casimir Perier. Double, pure white. Mme. F. Morel. Single, reddish purple. Buffon. Single, mauve-pink. Charles Tenth. Single, reddish violet. Congle, redaish vio-Congo. Single, redaish purple. Descartes. Single, clear pink. Edward Andre. Double, pink. Ellen Willmott. Double, creamy white. Pres. Grevy. Double bluish lilac.
Available in 4 to 5 ft.
for \$2.50 each.

Vauban. Semi-double. Lilac-pink.
Available in 4 to 5 ft.
for \$2.50 each. Katherine Havemeyer. Double, blu-William Robinson. Double. Deep Ludwig Spaeth. Single, large, deep rich purple-red.

All French Lilacs Each 3 to 4 ft.\$2.00

Symphoricarpos (Coralberry; Snowberry)

SYMPHORICARPOS chenaulti (Chenault Coralberry). 4 to 6 ft. An improved form of Coralberry, of more upright growth, smaller leaves and coral fruit.

5. alba (Common Snowberry). 4 to 5 ft. Small pinkish flowers in July, followed by white berries in winter.

5. orbiculata (Indian Corrant: Coralberry). 4 to 5 ft. A native shrub that in many localities grows in great masses. Bell-shaped white flowers in June, followed by coral berries.

Prices on above 3 varieties: Each
2 to 3 ft. \$0.75 3 to 4 ft. \$1.00

Tamarix

Graceful shrubs with few branches, feathery foliage and showy flowers. Will grow in very dry soil.

TAMARIX pentandra (Fixe-Shamen Tamarix). 6 to 8 ft. Beautiful blue-gray foliage, pink flowers in panicles during June and scattered throughout the summer.

T. african (African Tamarix). 7 to 10 ft. The lavender flowers are borne along the branches in spring before the leaves. Strong grower and excellent for a background.

Prices on both varieties: Each 3 to 4 ft.\$1.25 4 to 5 ft. \$1.50

Vitex Latifolia (Chaste Tree)

Weigela Vaniceki

Viburnum

VIBURNUM carlesi (Korean Spice Viburnum). 4 to 5 ft. A notable distinct shruwith rounded, leathery foliage and waxy pink flowers. Their very deligible full waxy pink flowers. Their very deligible for the control of t	lly
fragrant blossoms unfold with the leaves in spring. It is a real aristocrat are should be in every garden where quality is appreciated.	ıu

HILLENMEYER'S Kentucky Grown Fruit Trees "The First Crop More Than Pays for the Price of a Tree"

Fruits-The Money Makers are Coming Back to Southern Farms and Gardens

Wisely, many are again planting fruits. Changes during the past few years have shown clearly that farmers and gardeners who had a few bearing fruit trees were making money—or if they did not sell the fruit, they certainly did not have to buy at the store or on the market at high prices. So, the man who "raised his own" was ahead any way you looked at it.

For many years we have given special attention to truit trees and small fruit plants. This year we offer with great pride and confidence our Kentucky-grown trees, produced with the utmost core and skill, from fruiting trees of known parentage. Hillenmeyer trees are good trees, honest trees, and

sold direct from the nursery—not by agents whose commission you pay without getting a penny's worth of added value in the stock. As we sell direct to you, we do not ask fancy prices.

We propagate our fruits under careful conditions, taking every precaution to have them true to name, for we believe dependability of variety is our very best sales argument. We guarantee every variety to be as discribed and hold ourselves ready to replace, without charge, any tree that accidentally proves untrue to name. In addition to this dependability, our trees are suited to nearby conditions as we test all varieties before offering them for sale.

Apples

No other fruit is so dependable and generally desirable as the Apple. They will thrive in almost any well-drained soil. Their period of ripening extends from early July until frost and they can be kept through the entire winter. For family use there is no other fruit so indispensable. With moderate care they will pay a handsome return on your efforts and investment. We have kept our list of varieties up to date and you can plant any of them with confidence. Arranged in order of ripening as to season.

Summer Apples

plantings. Ripens a tew days ahead of Transparent. Hardy and bears when quite young. July 1-5.

EARLY TRANSPARENT. Waxy yellow; tart; excellent. Very early bearer; productive. Valuable for either home or market. Susceptible to blight on rich soil. July 5-6.

LODI. The best description of this variety may be to say that it is a larger, later Transparent. Pale yellow, tart, and ripens about a week later. Tree vigorous. Many think it will supplant Transparent as a commercial variety. July 5-10.

DUCHESS. (Often called "Oldenburg"). An old outstanding variety, productive, and best of its season. Ours is the "red" strain. Early bearing. July 10-15.

GOLDEN SWEET. Yellow. The best sweet we know. Vigorous grower; annual bearer, very productive. Hasn't a fault. July 20-30.

POLLY EADES. A Kentucky developed variety; while not well known, is superior to Maiden's Blush, yellow with slight blush. Bears early and quite productive. Plant on our recommendation and you will never regret it. August 5-10.

HYSLOP CRAB. The very best hardy Crab, producing a heavy crop of bright red tart fruit that is unexcelled for culinary purposes. Bears early. August 15-20.

Fall Apples

CLOSE. An early, red variety of outstanding promise both for home and commercial plantings. Ripens a few days ahead of Transparent. Hardy and bears when quite volume. July 1–5. gust 1 to September 1.

> McINTOSH. A fine fall or early winter kind that has won its way because of its produc-tiveness and extra high quality. Bright red; smooth, Plant it liberally in Kentucky. August 20-25.

> PADUCAH. A Kentucky product which very much resembles the Rome Beauty. About two or three weeks earlier, with more color. Prolific and a regular bearer. This variety stands at the top of the list as to production at the Kentucky Experiment Station. Sept.

GRIMES GOLDEN. One of the best of fall Apples. The most popular Apple of any season. Prist golden yellow. Matures early and is a heavy bearer. This variety is troubled with canker, shortening the life of the tree. We also offer "Double Grafted" Grimes Golden. which is a longer lived tree, at 25c extra. September 15-20.

Winter Apples

JONATHAN. An early bearing and long keep-ing Apple; red; medium size; quality good. Tree never large, but productive. Septem-ber 15-20.

ber 15-20.

BALDWIN. Red; large; good quality. Tree vigorous, highly regarded for eating and cooking. The commercial Apple of the East. October 1-.5.

RED DELICIOUS. As this extra red strain is such an improvement on the old Delicious we are propagating if entirely. When you ask for Delicious we give you this red strain at no extra cost. Fruit large, uniform size, and highest quality. Distinguished by the five lobes on the blossom end. Good for home or market. September 20-30.

YELLOW DELICIOUS. A yellow type of the old standard red Delicious which has become deservedly popular throughout the country. Bears young and of highest quality. September 30 to October 5.

quality. September 30 to October 5.

RED STAYMAN. Dark rich red. Fruit large, good quality and keeper; early to come into bearing and productive. We think this the outstanding Winter Apple for Kentucky. As the red variety is an improvement over ordinary Stayman, we are propagating it entirely and filling all of our orders from this selected strain. October 5-10.

TURLEY WINESAP. A seedling of Winesap which it somewhat resembles. Conical, rich red and and of highest quality. A recent introduction, bears early and

recent introduction, becregularly, October 10-15 bears early

ROME BEAUTY: Large; red, tender, sub-acid. Early bearer and productive. A popular kind in most sections. Oc-tober 12-15.

YORK IMPERIAL. A late keeping commercial Apple, shaded red on yellow skin. Flesh firm. Tree healthy. Regular and heavy bearer. Fruit sometimes lop-sided. Plant for profit or for home. October 15-20.

See Prepaying Policy, Page 31

Cherries

Not difficult to grow, but the trees do best in well drained, rich soil. The sour varieties grow more readily than do the sweets, but you can have both if the location is satisfactory. Be sure to plant the trees as soon as they arrive. Press the soil firmly around the roots; tramp it hard.

Sweets or "Heart" Varieties

This group grows luxuriantly, makes a fine showing for a few years, and then may die if not in soil that is exactly suitable. The following varieties are the hardiest of the group. You should plant two varieties of sweet Cherries for stripforty and limit the contraction of the group. satisfactory pollination.

BLACK TARTARIAN. Perhaps the most popular of the sweet varieties. Fruit is large, black, and heart-shaped. High quality. The tree is vigorous in suitable soil.

NAPOLEON (Royal Ann). Large; yellow, tinged with red; firm. The most popular and best light colored Cherry for this section.

				PRICES OF CHERRIES	Each	5
4	to	5	ft.		\$1.75	\$7.50
5	to	6	ft.		2.00	8.75

Pears

This old standard fruit is still being planted by many. Blight is its chief enemy, and as it is worse on deep, rich soil, do not over-stimulate by feeding. Planted in the back lawn it will make a beautiful tree in foliage, blossom and

BARTLETT. August 15. The favorite eating Pear of America, East or West. Large, beautiful yellow with soft blush; high flavor. Tree bears quite young. On account of its popularity everywhere it is the most sought after of the European Pears. More susceptible to blight than other varieties.

*KIEFFER. September 10 to 15. The most popular Pear for our section. Fruit is large, golden yellow, sometimes tinted red on the sun-exposed side. Flesh is firm, crisp, juicy and for canning purposes it is especially prized. From the tree it is not good to eat, and to properly ripen, gather carefully and place in dry place of even temperature. The quality improves and it is then desirable. For keeping longer, pack in shallow trays or wrap the fruit in paper and stare in a room free from frost. In this manner it can be kept until Christmas.

Christmas.

LINCOLN. Blight-resistant and bears regular crops. Perfectly hardy and quality almost equals Bartlett. Season of ripening about September 1st. Plant, with confidence. Considered by many the best of the Pears.

ORIENT. New introduction from Tennessee Experiment Station, Quality as good as Bartlett, it is said that it has never blighted in Knoxville area. Skin thick and slightly rough. Flesh is creamy white with good texture. Ripens about August 25th.

SECKEL. September 15. This small, high quality, yellowish brown Pear is one of the most popular of the September fruits. Of melting, juicy, and sugary quality (frequently called the "Little Sugar Pear"). Tree is of slow growth but lives long and is needed in every home garden.

Cluster and Sub-Acid Varieties

You may plant any of these varieties and you will be rewarded. This group seldom fails to bear a good crop.

IN DEPENDABLE NURSERY STOCK

EARLY RICHMOND. This old standard Cherry has been the favorite for years.

The fruit, borne in clusters, is tart and very valuable for canning, pies, etc.

Yields nearly every year and reddens the tree with its wonderful crop. It succeeds wherever Cherries will grow and is one of the earliest.

MONTMORENCY. Graduolly supplanting Early Richmond because of its size. Except for being a little larger and later it is practically the same. Not quite as acid. Good to eat from hand. The tree is hardy, blooming late, and frequently will make a crop when the sweet varieties fail.

Plums

They grow almost anywhere—garden, chicken-run, or orchard. Usually the trees are loaded with fruit, so it is wise to thin when too thick.

BURBANK. Late July. Fruit large, violet to light purple, with occasional shades of yellow. Flesh yellow, of excellent quality. For either canning or market this is the most popular kind. We believe it to be the hardiest and most prolific of the Oriental varieties.

DAMSON. A medium size, purple or blue Plum which is well known for its fine culinory uses. Damson preserve is the height of epicurean delight. It bears heavily and should be in every planting where Plums are wanted.

GREEN GAGE. Another outstanding old variety. It ripens in mid-August and its medium sized yellow-green high quality fruit makes it a standard by which others are judged. Tree moderate grower; healthy.

OMAHA. (Hybrid.) A promising kind, vigorous in growth and free from disease. Being an American-Japanese hybrid, it inherits hardiness and productiveness from each parent. Produces great crops of coral fruit, yellow fleshed and of good quality.

STANLEY PRUNE. A large, sweet, purple Plum with much merit. Introduced by the New York Experiment Station. Annual bearer, good for home or commercial purposes and the best of the "Prune" class.

Prices of Plum Trees TWO AND THREE-YEAR-OLD TREES

5 to 6 ft.\$2.00 \$8.75 Each 5 4 to 5 ft.

Apricot

TALBERT. Excellent quality, Bears early and selected for its hardiness.

Vectarine

SURE CROP. Imported from New Zealand by the United States Department of Agriculture. The best of all the Nectarines as to quality, size and hardiness.

MORE THAN ... That's how long we have grown Hillenmeyer's Quality, True-to-Name Fruit Trees.

A Gift for You

To help you get the best results from your plans and plants we will send absolutely free on request, a copy of this booklet.

"HOW TO PLANT"

The instructions are clear and cover planting, pruning, feeding, spraying, cultivating, and other details. This is a part of the service we give that you may have the greatest success and joy from Hillenmeyer stock. If other questions arise from time to time, write us—we are at your service.

HOME GROWN, TREE RIPENED FRUIT ALWAYS TASTES BETTER PLANT YOUR OWN!

SPRAY SCHEDULE

As recommended by University of Kentucky. Avai'able direct from Kentucky Experiment Station or from us.

Peaches

A home garden without Peaches? Just think what you are missing—luscious fruit from late June to mid-October if you select an early, a midseason, and a late. One tree of each is better than none, but if you have space, plant five of each class. For a commercial orchard you need a selection and several varieties—better write and ask our advice.

Planting and Care

The Peach is the quickest maturing of fruit trees, often bearing the second year after transplanting. Plant only in well-drained soil but otherwise follow methods recommended for other fruit trees.

When planting, prune rather severely, cut all side branches to 6 to 8 inches and head low. The tree gets top-heavy if allowed to develop a high head. Subsequent orchard pruning consists of shortening the terminal growth and keeping the tree compact and shapely.

Borers which live right below the ground line and frequently girdle the trunk should be removed annually. A chemical, Paradichlorobenzine (PDB), may be used to control this pest. Our orchard growing and nursery experience is always at your service. Write us your questions and we will try to help you.

Arranged in Their Order of Ripening

- MIKADO. (Free.) The best and most popular very early Peach to date. Medium size, round, yellow with red blush and of good quality. For best results should be planted with other varieties for cross-pollination. July 5-10.
- REDHAVEN. (Free.) Early. Hardy, firm and of excellent quality. An outstanding yellow commercial variety, almost completely covered with red. Should be in every orchard. July 10-15.
- RARITAN ROSE. (Free.) A New Jersey introduction of outstanding merit.
 Good quality, hardy, and the best early white Peach we know of. July 15-18.
- GOLDEN JUBILEE. (Free.) A new, lorge, early Peach, highly recommended by the Kentucky Experiment Station and other leading authorities. Yellow with a distinct blush. Quality fine. July 15-20.
- COLORA. (Free.) The outstanding feature of this yellow Peach is its hardiness. However, it is highly colored and of excellent quality. July 20-25.
- **OTHELLO (July Heath). (Cling.) A new and better cling which we are growing instead of the old standard Heath. Has distinct blush, white flesh of good quality and is highly recommended by the Kentucky Experiment Station. July 25.
- south HAVEN. (Free.) Better color and quality than Elberta. Large, and ripens 10 to 14 days earlier. Has been much hardier than other yellow Peaches and because of our tests we recommend it highly. August 5-10.
- HALE-HAVEN. (Free.) An excellent Peach introduced by the Michigan Experiment Station. A cross between J. H. Hale and South Haven. Large, midseason, yellow with blush. Good quality tree, healthy and hardy. August 5-10.
- Leavy and regular bearer. The best white-fleshed Peach for home or market. August 10-12.
- **ELBERTA. (Free.) Fruit large, yellow, shaded with deep red. Elberta has been the standard Peach for years, and is just as good today. More than 80 per cent of commercial plantings are of Elbertas. August 10-12.
- J. H. HALE. (Free.) Fruit large, yellow, almost covered with red; more highly colored than Elberta; flesh firm, melting, and of best quality. Ripens August 10-15.
- AFTERGLOW. (Free.) This new, beautiful, yellow-fleshed Peach is well named because the soft amber-red covers the entire fruit. Hardy, excellent quality and very productive. The only Peach we have found worth listing, ripening after Elberta. August 15-20.

ı	1	lb.	(makes	8	gals.)											 		.65	

* ASPARAGUS

WASHINGTON. This is the best known variety. It is a strong grower, producing stocks of large size and of finest quality. The and of finest quality. The fact that it is rust-resistant makes it the ideal Asparagus for all. Our plants, produced on heavy soil, are superior to the little seedlings grown in sand. All plants are graded and are large, fleshy roots that, with proper care, will be ready to cut the second year. Our plants will grow off much better than imported plants.

Strong Plants: 25 50 100 \$1.75 \$2.75 \$4.50

Ask for prices on larger quantities.

For Postage, Packing and Insurance Add 15%.

*CURRANTS

RED LAKE. By far the most productive of the many kinds we have tested. Color a brilliant red; large berries borne in long clusters along the stems; quality excellent. The white varieties have proved worthless in this climate.

\$1.35

*GOOSEBERRIES

DOWNING. Fruit almost round, large and juicy; best quality; whitish green color. Does especially well in the North.

HOUGHTON. Round, medium size; dark red when ripe; juicy, sweet. Thin, smooth skin. Bush is hardy, very productive, free from mildew, and the best for general purposes in this section.

Prices of Gooseberries: \$1.35 \$4.00 Either Variety\$0.50

*RHUBARB

Plant Rhubarb 4 by 3 ft., covering crowns not over 3 or 4 inches. **EXCELSIOR.** Very early, with long stem. Plants vigorous and dependable. Each MacDonald. New, bright high quality Canadian variety, mildly acid. Takes less sugar. from divisions rather than seed. The best. \$2.50 Price\$0.60

HILLENMEYER'S FAMOUS KENTUCKY BLUE GRASS SEED

*BLUE GRASS

Here in the heart of the famed Blue Grass Section of Kentucky, the best seed in the world is produced. Hillenmeyer Seed is of the highest quality, both as to purity and germination. Do not sow light, chaffy material of weak germination and carrying many noxious weed seeds. Why gamble with poor seed? Plant the heet.

**SHADY LAWN MIXTURE

A scientific mixture of grasses to be used in shady locations on which the sun does not shine more than four or five hours per day.

Sow 2 to 3 lbs. to 1000 sq. ft. on thin lawn, 4 to 6 lbs. to 1000 sq. ft. on NEW lawn.

*SUNNY LAWN MIXTURE

For sowing new lawns or where you have a thin stand we recommend our Special Lawn ixture. This consists of Blue Grass, White Clover, and other varieties for quick effect.

NOTE ON LAWN SEED

The Blue Grass seed crop is short, prices higher and the quality somewhat below average. However, we are maintaining a high standard and keeping our prices as low as possible under the circumstances and assure you that value will be given. These prices are for fall and we will notify our customers, when order is received if there is any change in the spring.

*These Plants Can Be Sent by Parcel Post. See Prepaying Policy, Page 31.

Hillenmeyer's Small Fruits **GRAPE VINES**

Other crops may fail but you never lose all the Grapes—unless the boys get them. Grapes are a sure crop. Vines bear every year, need little attention except training, lots of sunshine, and plenty of plant food and an occasional spray. In the home garden, use sheep manure or bone meal; in the vineyard, use well rotted manure.

2-year-old vines\$0.40 \$1.75 \$12.00

Black Grapes

CONCORD. The best general-purpose Grape grown. Berry large; bunches shouldered and compact. Should be the "backbone" of your planting. Special prices on large quantities.

FREDONIA. Outstanding Grape, ripening a week or ten days before Concord. Berries and bunch large. Good

quantities.

FREDONIA. Outstanding Grape, ripening a week or ten days before Concord. Berries and bunch large. Good quality, vine vigorous.

MORE'S EARLY. An extra early variety. Medium bunch; large black berry. Vine is hardy, very reliable, and does well wherever planted.

SHERIDAN. An excellent, large Grape, ripening about a week after Concord. Very compact bunches but sometimes tries to overbear.

White Grapes

NIAGARA. The best white Grape. Bunch and berry large, meaty and juicy; flavor perfect. Medium season.

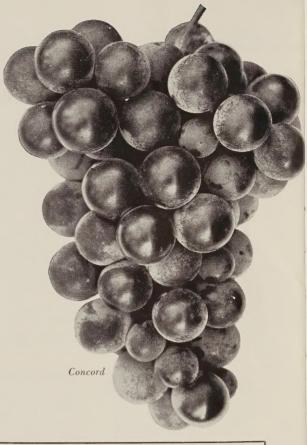

PORTLAND. The best early white for home and market. Vine moderately vigorous, fruit large and of excellent quality.

Red Grapes

CATAWBA. Standard late red Grape that has lost none of its popu-larity. Season and quality make it indispensable.

LINDLEY. Of exceptionally good quality; large; ripening in mid-season. Vigorous of vine and hardy.

LUTIE. Best extra early Grape of its color, and good size.

STRAWBERRIES

Strawberries should be planted only in the spring. When set in the foll, with alternate freezing and thawing, they usually heave out of the ground and die. We will have them listed in our spring literature which will also give cultural directions. The following varieties will be offered:

Blakemore

Premier Tennessee Beauty

Tennessee Shipper

PLANT ONLY IN THE SPRING

*RASPBERRIES

We have tested many kinds of Raspberries and after due consideration are listing only four. These have proven best under our Kentucky conditions and we recommend them with confidence. Raspberries should be planted in every home garden, as they require small space and produce an abundance of our finest table fruit. Contrary to general belief, Raspberries and Blackberries want good rich soil.

CUMBERLAND. Black. The best of its color for this section.
Large, prolific and of good quality.

INDIAN SUMMER. Red. A repeat-bearing variety of merit.
Produces a good crop of early berries and then another in the fall if weather is favorable.

LATHAM. The best all-around Red Raspberry. Large, pro-lific, good quality and firm. If you plant only one Rasp-berry, plant Latham.

SUNRISE. Red. A new early berry which is doing well in our section. About a week earlier than Latham. Not quite as large but of highest quality. Also hardy.

12 for 25 for 100 for Quotations on larger quantities.

*BLACKBERRIES

EARLY HARVEST. Extra earliness and productiveness make this type the leading commercial and home variety. Is through with its crop when the wild ones begin to ripen. Hangs onto the canes well, and is a moneymaker.

12 for 25 for 100 for

* DEWBERRIES

We consider Lucretia the best Dewberry, making a very vigorous growth and fruiting early. The berries are large, jet-black, and of fine flavor. May be allowed to develop on the ground or trained, in either case producing large crops

PLANT FOOD AND MULCHING MATERIALS

Fertilizers and Peat Moss are Sent Transportation Charges Collect-Cannot be Sent by Post.

Driconure

A perfectly blended combination of Nature's products—cow manure, poultry manure and peat moss. A complete fertilizer plus a sofety factor that prevents burning and over-feeding. Driconure is clean and absolutely free from weed seed, insect life, fungus and useless filler. Practically odorless, finely ground and eosy to distribute. An ideal, allorganic food and soil conditioner. Use a handful or so, worked in the soil around plants when setting or 50 pounds per 500 square feet.

71/2-lb. bag, 75c; 50 lbs. (2 bus.), \$2.50

Cattle Manure

A packaged product that has been sterilized and dehydrated, easy to handle, excellent for piants and flower beds.

50 lbs. (about 2 bu.), \$2.50 25 lbs. (about 1 bu.), \$1.50

Peat Moss

No other material is quite its equal for soil conditioning. It will retain 6 to 10 times its dry weight in water, and is free of all weed seeds. As a mulch, especially for Roses and perennials, it has no equal. Sold in bales of approximately 12 bushels which will cover 300 square feet 1 inchep. Spaded in with manure it has the ability to absorb enormous amounts of fertility which the plants readily take up. Indispensable to good cardening.

gardening.

POULTRY LITTER. Peat Moss is also the ideal, safe and sanitary material for bedding young poultry.

\$5.00 per bale; 5 bales for \$23.75

Vigoro

Vigoro is not just an ordinary fertilizer but a complete, balanced, scientifically prepared plant food containing all eleven of the elements necessary for proper development. Use 25 to 50 pounds per 1000 square feet on lawns, one handful to each square foot around Roses, Shrubs, and Evergreens. Water-in after applying.

10 lbs., 95c; 25 lbs., \$1.70; 50 lbs., \$2.70; 100 lbs., \$4.85

Turf Builder

This is especially made for feeding grass, though it can be used whenever a complete fertilizer is needed. It is not all chemical but contains vegetable matter, thereby giving immediate and lasting results. Because of its concentration will go much farther than most other fertilizers. If grass is tender, "water-in." Can be used for tree feeding and for this we recommend three. go much tarther than most other fertilizers. If grass is tender, "woter-in." Can be used for tree feeding and for this we recommend three (3) pounds per diameter inch. For broadcasting use 10 to 20 pounds per 1000 square feet.

25 lbs., \$2.50; 50 lbs., \$3.95; 100 lbs., \$7.85; 500 lbs., \$35.00

PREPAYING POLICY

We wish we could set a schedule for prepay charges, on a percentage basis, as in the past, but since rate increases on practically all forms of transportation are pending, we are unable to do so. All items on pages 29 and 30, and Peonies can be shipped by Parcel Post. When you order these items only, include 15% for postage, packing and insurance, if you live within 200 miles of Lexington. On all other stock, please remit the price of the plants only and we will send with THE TRANSPORTA-TION CHARGES COLLECT. Please specify how you want shipped. If you order small fruits or Peonies in combination with other material, do not include postage, since en tire shipment may be sent with TH TRANSPORTATION CHARGES COLLECT. THE

Delivery

No charge for local delivery in city and sub-divisions adjacent thereto. Truck delivery beyond this can usually be arranged satisfactorily, de-pending on quantity and distance. On orders to be shipped, prices are f.o.b. Lexinaton deports shipped, prices are f.o.b. Lexington depots.

GUARANTEE

(See inside front cover)

Substitution

When out of a variety of fruit trees, small fruit or Roses, we sometimes substitute, giving you the closest to it. If this is not satisfactory, mark "No Substitutes" on your order.

If Any of Your Friends Should Want One of These Catalogs, Have Them Write Us for Catalog No. 112.

Nandina 9 Silver Bell (Halesia) .. 22

NO AGENTS

WE HAVE NO AGENTS who go from door to door or sell on commission. Appointments for landscape work are usually made by phone or correspondence. If you want to contact someone from our firm, please call or write. Our catalog is one of our salesmen.

Many unscrupulous and transient salesmen go about the country representing themselves as our agents. Do not believe them. While we do sell some stock to dealers, they must make their own terms as to price, collections, guarantees, etc. Since some of the material they sell often does not come from us, the way to get true-to-name Hillenmeyer stock is to buy direct. Again, WE HAVE NO AGENTS

Peonies The Flowers for Everybody

There are few flowers which have been improved more than the Peony. From the old-fashioned reds and pinks, familiar in our grandmothers' gardens, we now have marvelous varieties with better color, form, and all-around quality. Peonies are often rated on the basis of 10 as perfect but we are frank to state that we do not always concur. We have tested hundreds of varieties so as to give our customers the best and find that some of the highest rated kinds just do not perform satisfactorily here in the South. The kinds offered can be planted with confidence.

can be planted with confidence.

They should be in every garden. Plant the crowns about 2 or 3 inches deep, use bone meal, see that they get sufficient water at blooming time and you will be more than pleased if you use HILLENMEYER'S CHOICE ROOTS.

STRONG DIVISIONS—YOUR ASSORTMENT \$1.00 each; 10 for \$9.00 For Parcel Post and Insurance, add 15 per cent.

*SINGLE PEONIES

This type is distinguished by its five or more large petals surrounding a center of yellow stamens. Most are early and they stand wind and rain well. Very conspicuous.

Albaflora. Large white flowers of unusual beauty; prominent tuft of golden

Duchess of Portland. Delicate shade of flesh-pink; large.
L'Etincelante. Rose-pink, margined silver. One of the best.
The Moor. Very attractive deep rich red of unusual beauty; stamens yellow The Moor. Ver and striking.

*JAPANESE PEONIES

In these we have five or more guard petals surrounding a center of showy and abortive anthers. The second stage of development into the double type. Akalu. Guards deep American Beauty shade; petaloids conspicuous saffronyellow, margined rose.

Nippon Beauty. Late, Dark red stamens flushed, edged yellow. One of the best

Ruigegno. Dark maroon, with petaloids of most pleasing yellow. Very showy.

Snow Wheel. Large, pure white petals and petaloids. Our best white Japanese

*DOUBLE PEONIES

RED

Bunker Hill. Beautiful bright red with long, stiff stems. Has done exceedingly

well with us.

Felix Crousse. Midseason. The most pleasing velvety red, fading to lighter shades os the blossom fades.

Karl Rosenfield. Late midseason. Large, showy, rich velvety crimson. Color

Longfellow. A distinctive, fadeless crimson. Good foliage with strong, stiff stems. Early midseason, Dependable.

Mary Brand. Vivid crimson with silvery sheen which gives it added brilliance.

Mary Brand. Midseason.

MICHAEL MICHAE

PINK

Edulis Superba. Early. Deep rose. Valued for its fragrance and freedom of

Georgiana Shaylor. Most exquisite shade of soft rose-pink, Midseason, Fra-

Lady Alexandra Duff. An unusual delicate flesh-pink. One of the most striking of all Peonies, with extra large, cup-shaped flowers.

Martha Bulloch. Silvery shell-pink at center, deepening to deep rose-pink.

Mons. Jules Elie. Early to midseason. Large, compact; lilac-rose with lighter pink base petals; fragrant. Extra fine.

Reine Hortense. Midseason. Lorge, flat; flesh to shell-pink; very fragrant. Reine Hortense. Mi

One of the finest.

Samuel Hughes. Late. Fine upright variety with unusual style and color combination—silver-pink. Excellent variety.

Sarah Bernhardt. Late. Very large flowers of apple-blossom-pink, with silver-tipped petals. Vigorous.

Solange. Late. Large, compact. Outer petals delicate, waxy white, deepening toward the center with shades of golden brown. Free bloomer.

Venus. Midseason. Pale hydrargea-pink. Large.

*These Plants Can Be Sent by Parcel Post. See Prepaying Policy, Page 31.

We are not listing Roses in this catalog, but will mail a special folder listing choice varieties in February, 1954. If you do not receive your copy write or phone for it.
